Executive Summary:

A passionate Biomedical Engineering student with strong analytical and programming skills, seeking a role as a Python Developer. Skilled in data analysis, problem-solving, and software development with a focus on healthcare technology. Dedicated to applying technical expertise to create innovative and efficient solutions that enhance system performance and user experience.

Education:

BE-Biomedical Engineering in Dhanalakshmi Srinivasan Engineering Collage CGPA of 8.85-in the duration of 2022-2026.

Technical Skill:

- Python - Intermediate
- Json-basic
- Streamlite-basic
- Mysql-basic
- Artificial Intelligents-basic

Certification:

- Artificial Intelligence: Concept and Techniques -83% - NPTEL
- CONCLAVE(AI Revolution in cyber security summit'23)
- Certificate Of Completion(CSS)
- ROS2 Workshop(Karthikesh robotics private limited)
- MongoDB Basic for students
- PYTHON using AI Workshop(AI FOR TECHIES)
- NPTEL(Microsensor, Implantable Device And Rodent Surgeries For Biomedical Application[68%])

Area Of Interest:

- Python ,
- Artificial Intelligent.

Experience:

- Internship (KAV Biomedical Equipment Training and Education-6th semester-Get knowledge about basic to advance equipment-one week)
- Conference(ICTRLS -2025-Topic of Printing of inner ear using 3D printing -A REVIEW 6th semester)
- Workshop(Sathyabama Institute Of Science And Technology-Hands on training on Advance Biomaterial- 3rdsem)
- Trainer(Meenakshi Hospital Tanjore-Get knowledge and gain working experience in hospital sector – 10 days-2nd semester)
